

Maintenance-free AGM & GEL batteries

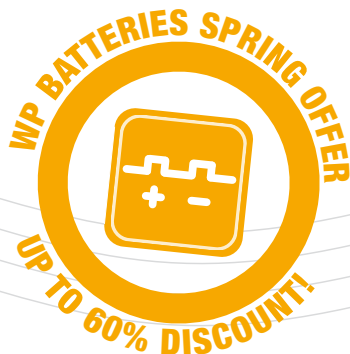

Batteries with
the longest lifespan

**Spring offer:
Up to 60% discount!**

smart energy solutions

THE DIFFERENCE

Comfort and safety, when sailing or navigating for example, are determined by the electrical system. And the battery takes the lead in every installation: Premature discharge or a defective battery can have major consequences, making it essential to select a battery that suits your needs. It is also important to check your battery in due time to prevent unpleasant surprises.

WhisperPower has the solution. Our superior long life GEL or AGM batteries and WBM battery monitor can make all the difference. Suitable for both starter and service activities, they do not require replenishing and have a lifespan of over ten years!

THE INCONVENIENCE

We've all been there: Thinking that the starter and service battery is still in good shape then finding a problem when we first try to start, ruining the first day of sailing. Seeking a replacement battery at short notice, you find that these are only available at high prices and (over) long delivery times.

THE SOLUTION

Take the time and select the perfect battery now to avoid discomfort. Make the most of the winter break to fit your new batteries and ensure your yacht is ready for the sailing season. To make the decision easier we are offering you a 25 percent discount on our already attractively priced GEL or AGM batteries until 1 January 2012.
